Then, Momo, a pink teddy bear hands the mail and goes out from the door.

Let's see the pet house for the attention, following Momo.

This user keeps Furo, a kitten.

Momo is arrived and leaves a mail on the table.

Just E-mail can be received.

Your own pet appears to your friend's PC to deliver your E-mail.  
This is the PostPet.

Next, let's see how to return the mails/

Click the button for "return mail".

Enter the message.

Furo, the kitten carries the mail and goes out. Then we returned the mail.

Like these, even the beginners for the Internet Mail can use the PostPet easily and joyfully.

Further, we have much more enjoyable functions;

The pet can write its secret daily and E-mails and send them to the users.

The pet picks up some gizmo. The pet makes a friend with other pet.

The user can change the pet house.

The conditions of the pet can be checked at this menu.

Please be introduced our four pets;

Momo, a teddy bear  
Momo likes something lovely.

Sumiko, a tortoise

Sumiko is clever, but argumentative.

Furo, a kitten

Furo sometimes divines the weather. Furo doesn't like be washed.

Mippi, a rabbit

Mippi is nibbling something every time. Mippi likes to send mails.

You can keep only one pet on your PC.

When you install the PostPet, you can choose your pet.

After your friend check the mails, your pet can go home.

When the pet is out of the pet house, how can we send a mail?

Don't worry. At that time, we can ask the postman.

The postman is gentle and kind robot. Whenever we call, he appears and carries our mails.

While your pet is out of your pet house and you want to send a same mail to several persons at the same time, you can ask the postman to carry your mail.

Like this, the PostPet is mixed with the function of E-mail and some entertainment factors.

Together with these lovely pets, let's enjoy E-mail communication through the Internet!
