

Lamb & Company Presents **Huzzah (Bobaloo the Beast Boy)**

With *Huzzah*, Lamb & Company ushers in the dawn of "expression mapping." Every nuance of actor Kevin Kling's body, face, and hand motion was simultaneously captured and then mapped onto the computer-generated character of Darren. In fact, only the camera moves were animated conventionally. Which is why we refer to *Huzzah* as "97% animation-free!"
