

I 32/2

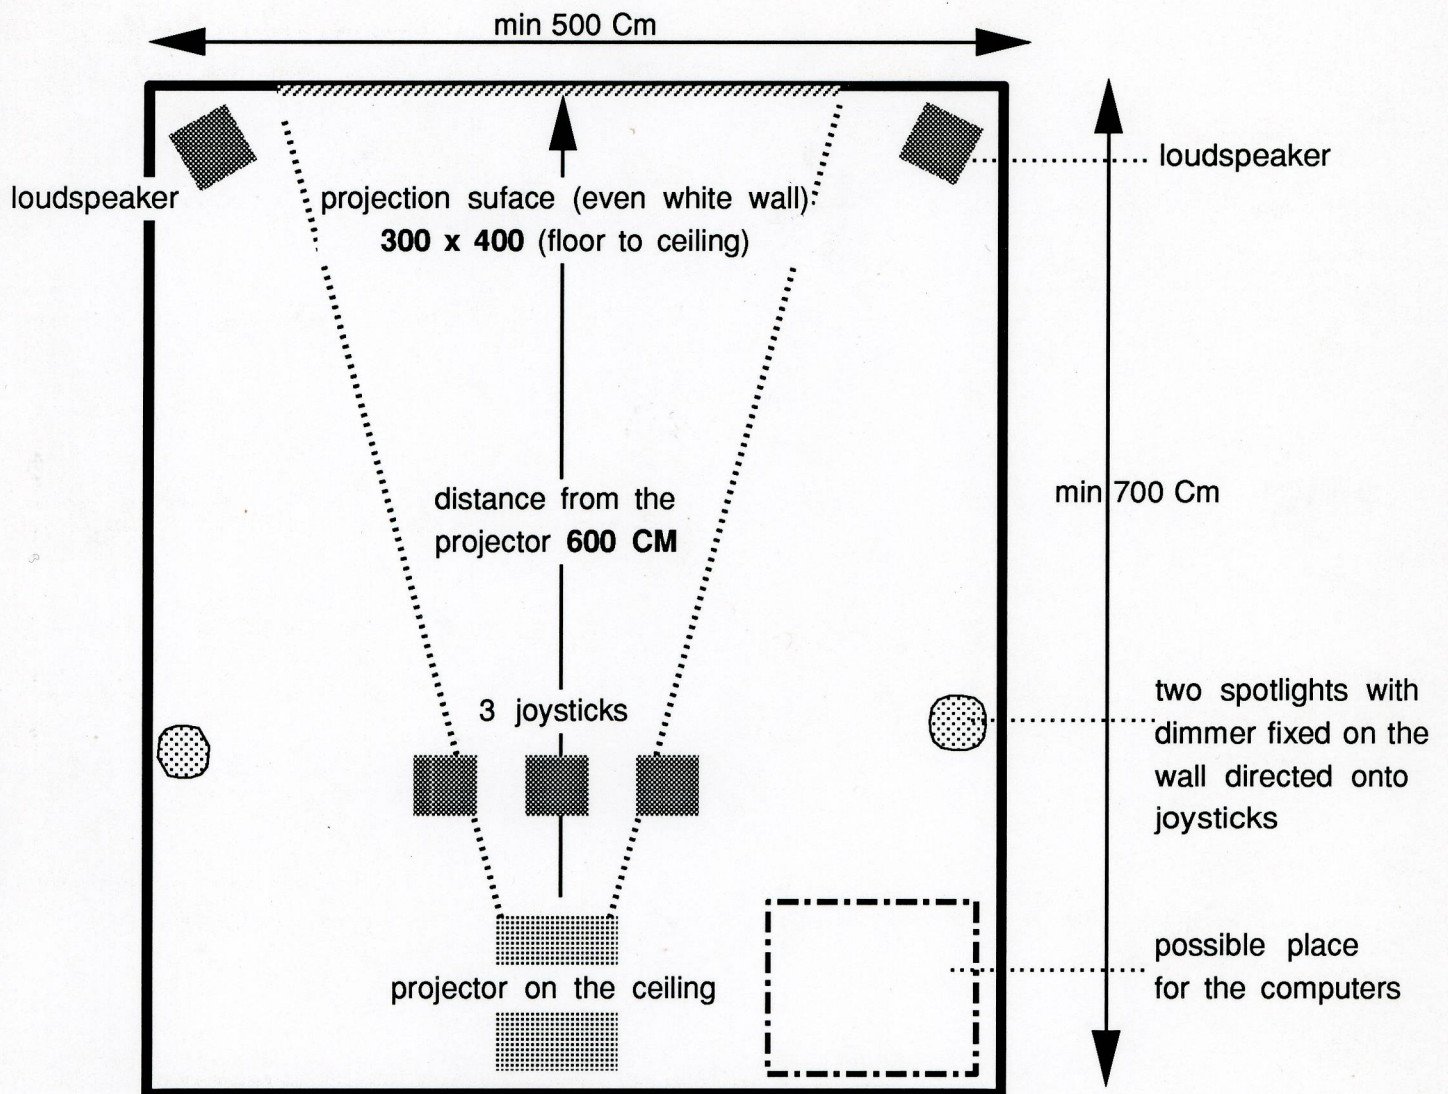

The room has to be dark, the entrance must be provided with a light blocking system. The projection screen can be replaced with the white wall, but around the circular white surface that would serve as projection surface, the wall has to be black. The all the other walls need to be black as well. The computer should stand in hidden a place to the public.

SPACE REQUIREMENTS OF THE FRUIT MACHINE

Specification of the exhibition space:

The wall has to be black everywhere except the projection surface 400 x 300 cm (painted or covered)

For the equipments a separate space is preferable!
VGX, and monitor, 386 PC and monitor; Yamaha tone generator; amplifier
all this needs appr. 1.5 m² surface. **The equipments must not be accesable to the visitor.** If other space is not available the computes can be placed next to the projector. In this case we need to find a solution to separate these equipments.
