

JEFFREY SHAW virtual world voyaging

DIAGRAMS SHOWING THE BASIC FORM OF THE INSTALLATION OF THE LEGIBLE CITY.

Indicated is a typical dark space and its minimum proportions. Computing equipment is usually hidden behind the screen. The bicycle may be closer to the screen, and often has been mounted on a wooden platform. In some circumstances the projector may be located under this bicycle platform, instead of being hung from the ceiling. The room is completely dark, with only small spotlights illuminating the bicycle.
