

the people stood together

quickly you're
going to miss it

yeah
yeah
yeah

the people marched

no one could agree on the message

the people stood alone

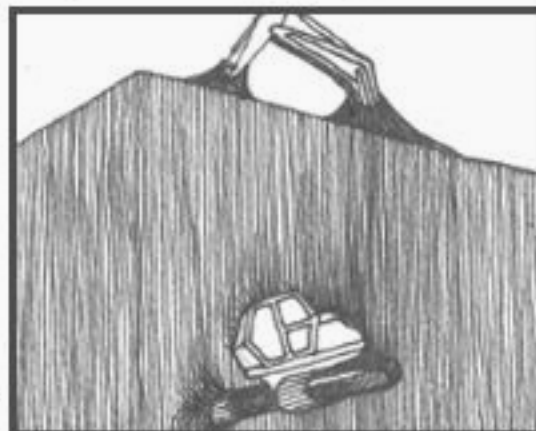

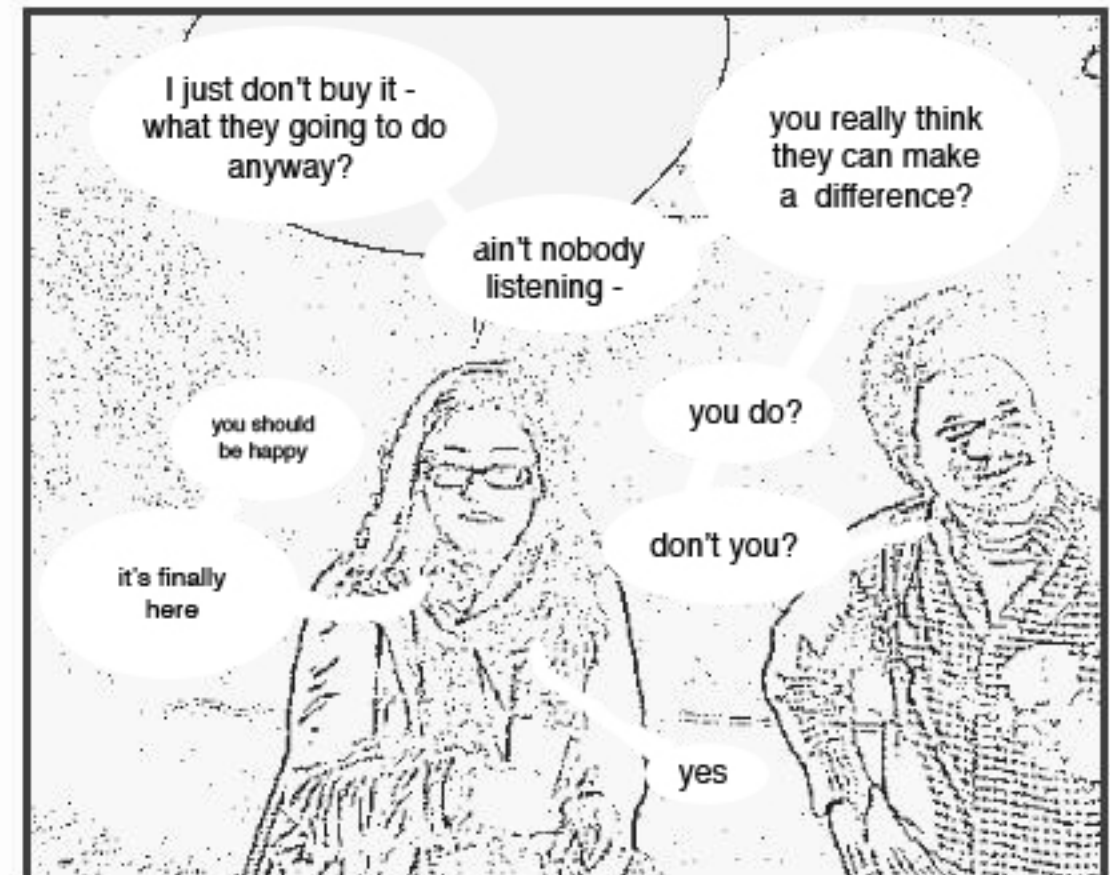

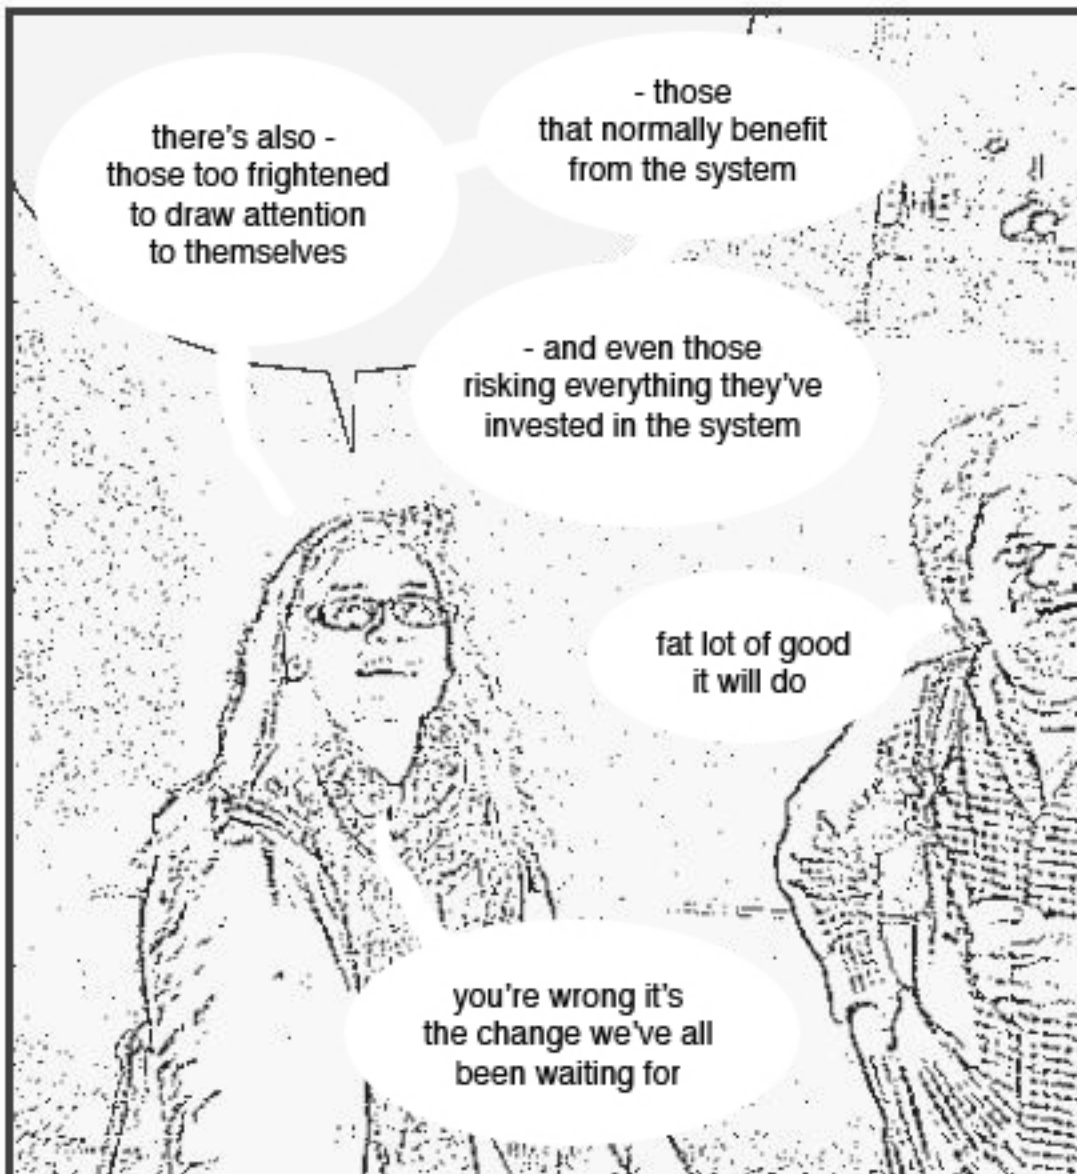

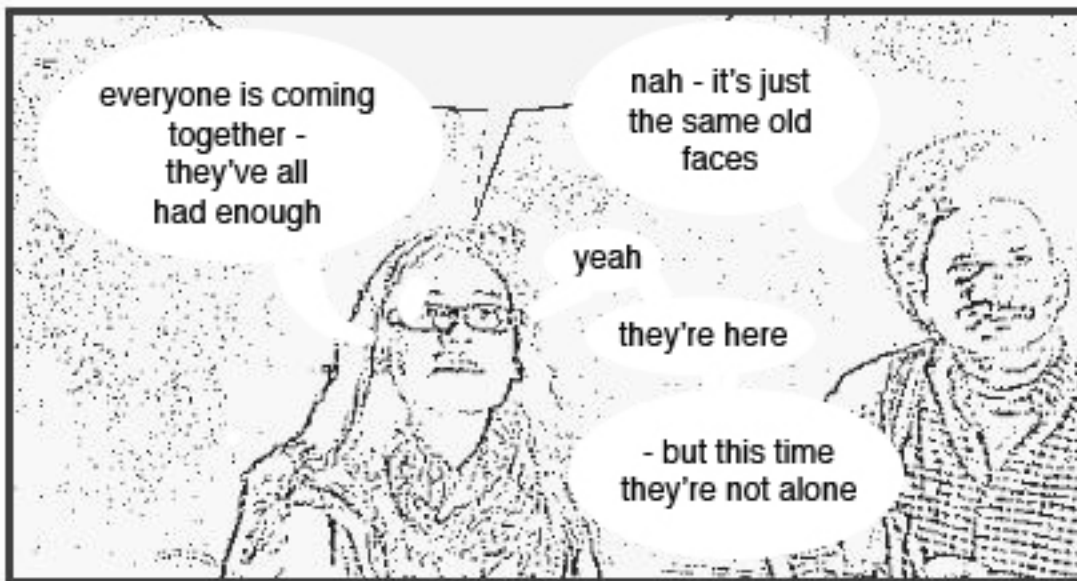

the people planted
seeds among the rocks

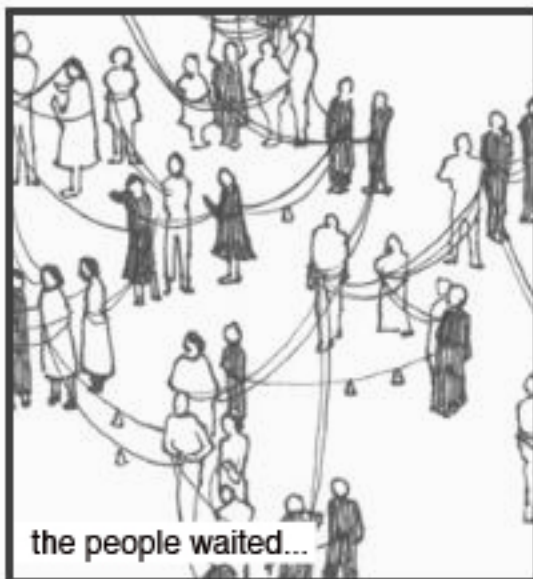

it's on the
television -

it's happening
right now!

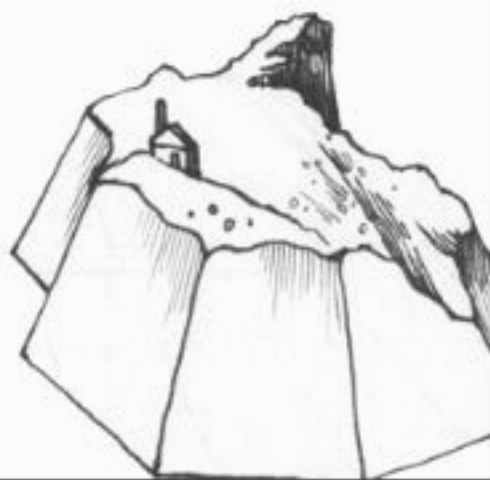

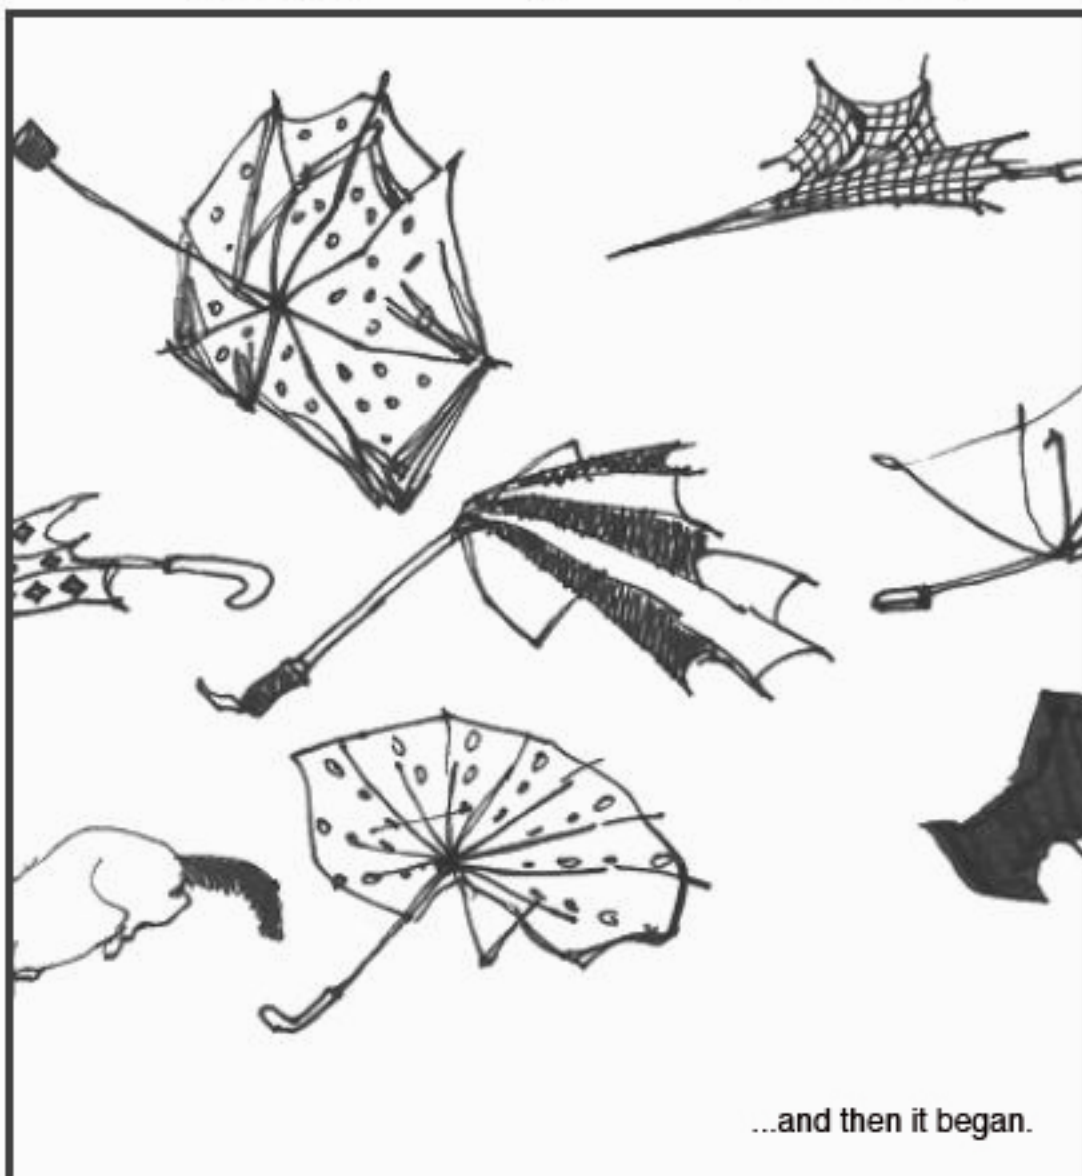

the people waited...

the whole island waited...

it's really happening

...and then it began.

the people used machines to smash the system in order to free themselves from themselves

to find their own way

to fend for themselves

to speak out
