

Optical Tone

dynamic color composition

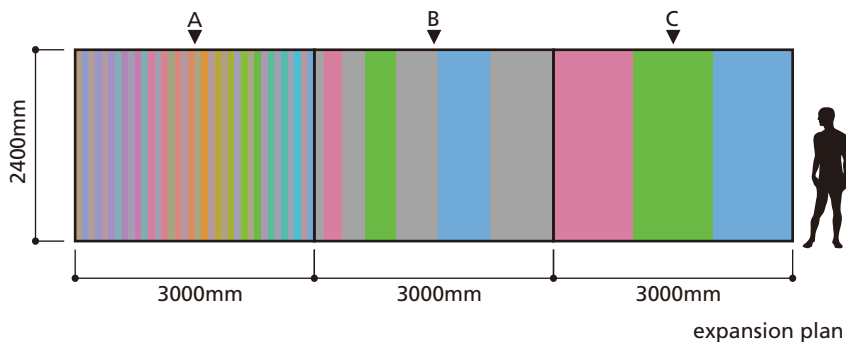

Floor plan

The installation booth should be surrounded by 3-sided walls painted in the color pattern. Size of the wall is 3000mm width and 2400mm height, 4 LED light devices will be located in the booth. The power will be provided by original cables from a tap on the floor. The installation is very sensitive to disturbance of external lights. The booth must be kept totally in dark environment covered with the walls.
